

I'm not sure but I think I'm a **WEBDESIGNER**

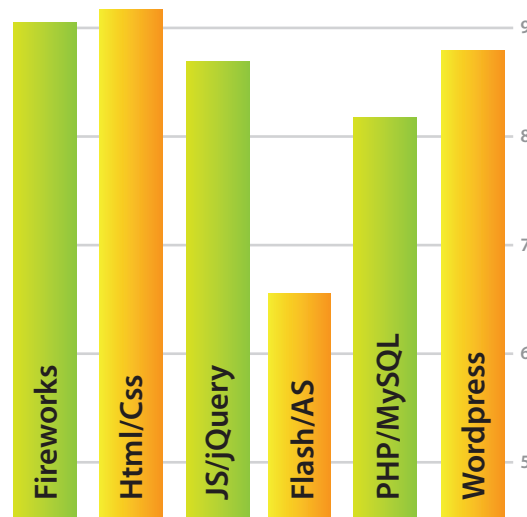

I'm a web designer/digital creative/coder/pc geek (honestly I don't even know who I am anymore).

- Web designer
- Digital creative
- Web coder
- Computer geek

* A recent survey carried out by Michele's brain

I can tell you that **I have been making websites since 2000**, I have a lot of experience... and the 1000 other typical boring traits you've read on the billions of resumes you've received. What differentiates me, is my **strong passion towards web design and development**. I love it! I always put all my **imagination** and **creativity** into all my web projects.

what i do Build Websites with any type of technology (HTML5, CSS3, JS, Flash), Wordpress themes, iPhone/iPad app, UI Design

my education Self taught, I've never attended schools or taken courses. The internet and my geek friends are my school!

spare time I like to go out with my friends, play soccer, watch movies, take photos and also listen to music !
